Tuesday September, 13, 2011—11:30 AM

Meeting Location: University of Memphis- Fogelman Building

This months program and speaker

Heat Pipes for Energy Recovery and Dehumidification

By

Kim Folken

Applications Engineer

Heat Pipe Technology, Inc.

a subsidiary of MiTek®,

a BERKSHIRE HATHAWAY Company

Kimberly Folken

- ◆ Graduated University of Florida with Bachelors in Mechanical Engineering in Spring of 2008
- ◆ Applications Engineer with Heat pipe Technology for over 3 years
- ◆ Heavily involved in the design of heat pipe systems for many projects including multiple pharmaceuticals, large university jobs, hospitals, including the design of the heat pipe system for a local Glaxo Smith Kline plant which won an ASHRAE chapter technology award this year

The Presidents Corner

September 2011

President's Corner

As summer ends and we all get back to our routines, I urge you to make it a priority this year to attend as many meetings as possible. Most of the programs are already set, but there are a couple of openings left. If you have suggestions or programs in mind, please contact Will McGhee. I look forward to an exciting year with great speaker and topics.

We had a terrific CRC this year in Lexington, KY. Most of our chapter chairperson's made the trip. Our chapter won the award for the most people attending with the least environmental impact. There are several committee positions, volunteer openings, and sponsorship opportunities available at the local chapter level. Our own Jeff Gatlin is the Region VII director and regional chair, so if you are interested in getting involved on the regional level, please let him know.

The annual ASHRAE golf tournament date has been established. The tournament will be held at Mirimichi on October 12th, 2011. I think everyone had a great experience out there last year, and it was a big success. Hopefully, this year will be even better. Jonathan Lancaster is heading up the effort. Please contact him if you are willing to sponsor, volunteer, or play. At only \$125 per player, this is a wonderful opportunity to get out of the office and enjoy an afternoon with colleagues. Please come out and support ASHRAE research. A large portion of the money collected will go to ASHRAE research. It is completely tax deductible.

Thanks,

Ryan J. Hertter, PE

Like us on Facebook

The Facebook logo, consisting of the word "facebook" in white lowercase letters on a blue rectangular background.

<http://www.facebook.com/pages/Ashrae-Memphis/254946981182784>

This will in no way replace our website, simply complement it. Facebook will give us a venue to quickly broadcast messages to our membership and receive real time feedback. In addition, the event-posting capabilities will allow us to advertise upcoming events easily and efficiently.

I am also looking into Google+ and Google Groups which looks to have more powerful apps we may be able to use as a chapter. I have a few personal invitations for Google+ if anyone is interested.

As always, any comments or suggestions are welcome!

Thanks for your help!

Kevin

Employment Opportunities

Local Members Network

We are extending the newsletter and the website to those who want to advertise "open" positions within your company so the local members will get the opportunity to see those positions.

We will also advertise individuals who have lost their job and want to solicit themselves to the local chapter.

This service will be free of charge for member companies or individuals.

These postings will run for 30 days unless otherwise requested.

[Email the Webmaster with your postings](#)

ASHRAE Career Center

<http://www.ashraejobs.com/>

ASHRAE has launched its full services Career Center for ASHRAE members and HVAC hiring authorities.

The Career Center is user friendly. The products and services match that of traditional big box boards such as Monster.com, yet the information and postings are specific to the ASHRAE Community. Job seekers have a shorter and more pleasurable search experience, and employers have immediate access to a pre-filtered pool of talent.

One unique feature is that Center highlights ASHRAE members. The online job application form requires an applicant to identify themselves by membership status. So does the resume posting form. And, employers can sort applications and resumes by their status. Why did we agree to keep this open to non ASHRAE members? Because career research is the fastest growing use of the web and we also see this service driving ASHRAE membership.
